Disaster is e necessary part of human experience. Even the year when it rushes through the summer, has its fall; but it gets ap again and goes on as though nothing had happened.

From the remembrance of our faults we draw the most efficacious counsels, and find the secret of that language which make them understood by others. There are ways enough of advantageously helping our fellow-men, pro-rided we keep in view the grand leading principle not to paralyze or deaden their laculties by withdrawing the stimulus to action, but to improve and develop them by every effort we make in their behalf.

WESTBORD REPORM SCHOOL, The majority and minority reports of the Trustees on the combillon of uffairs at the Refurm actuol in Westfairn have been published. We have rom both very carefully, and we must say, that while there is unionlitedly considerable truth in the statements made in the former as to the nurcliability of the testimuty of the hoys and of some of the officers, that report, like nearly every one we get when a complaint is made against officials in ony public institution, bears to our eyes pulpable evidence of whitewash, which, like charity, covers

The minority report, written by Ifon. M. J. Flatley, of the governor's connell, appears in be n carefully prepared document giving a fearless, honest opinion of the condition of the institution and of the fitness of the superintendent for the position he holds.

That he did ask permission, here is civilized Massachusetts and in the latter end of the 19th century, proves conclusively that he is not the proper person for the place, and we have not a very explied ophnicic of those who granted him that permission. That man must be worse than a fool who professes to believe that a boy can be reformed by heating him. We have a society for the prevention of cruelty to animals, and when an agent of that so clety prosecutes a man for cruelly lashing a horse, he can not plead in extensatlan that the horse was ugly or you

sure safety to passengers, and to adopt all such as are really valuable. The rule above mentioned, if adopted by the Troy and Greenfeld road, would not have necessitated an outlay of nuything like pone-half of the damage to its property by this accident, by which three nieu lost their lives, and a large number of consequers passengly asking an evening train Boston in and troin Nautasket Beach of Consequers passengly asking the property asking an evening train and troin Nautasket Beach of the property asking an evening train and troin Nautasket Beach of Consequers passengly asking the property asking men lost their lives, and a large number of passengers narrowly escaped either leath or fearful liquities. Therefore even on the small and selfish score of econouty if appears that it is for the interest of the stockholders of a railroad company to adopt every feasible measure to guard against accidents, and we think it would be only a proper regard for the travelling public to give our railroad commissioners authority to compel the adoption of such rules as they see clearly, as in this case, are so simple as to be readily understood and yet very effective guards against collisions.

The fire at South Hingham of which our Hingham correspondent speaks in our last issue, was a little overdrawn. The barn contained at the most only The barn contained at the most only about three tons of lay, instead of ten, as was stated. There was only one lorse, besides wagons and farming tools, which were soon removed without much trouble, as the fire when first discovered was in the hay loft above. The most gratifying thing to the lookers on during the fire was the success of the hydrants in putting but the fire. The barn was between two houses, nearly touching them, and under full headway before the fire department arrived. With the ordinary life engines its quite likely the buildings all around the corner would have been burned. The hydrants furnished four streams of water and could have added two more if it had been necessary. The work of putting out the lire was of short duration, as all confessed who witnessed the scene. Since then application has been made to extend the

ALL AROUND THE HUB.

The Common Conneil, with more of less of serious Intent, lina been considering the feasibility of tapping Lake Winnlpiscogee for a waler supply fur the Hub. We think our state should aupply water enough for its metropoils, that we should obtnia all that is needed for every conceivable purpose without being obliged to go to New Hampshire for it. The estimated cost of the work is between twenly-five and fifty millions of dollars, but so accustomed have the peopie become to think and talk of Jig wouldn't frighten them much in prospect. People are wonlerfully easy about Incurring laslehtedness that other people will have to pay. We don't believe there is any need of going one hundred and fifteen miles to obtala such a supply of water as the city of Boston needs now or will need one hundred years hence, though pure water is auch a neceasity that no large city should be withbe; still, while we have no idea that a dozen people in Boston, outside of the common council, have given the matter that the time may not come when floston in connection with other eitles, will tap that New Hampshire lake. That one have lanumerable branches, as of course the supply of water would be practically lnexhaustible, and the expense dinot fail heavily npon my one. We dou't expect to live to see the work commenced, but when we look back lifty years and see wint has been done that those theu living were "dead suro" could never be accomplished, we are very chary of saying of anything, "tha

Sunday morning eame, and the first place of interest was Albuquerque. This is a new town, scaccely twn years old, but ob'a mushroom growth, it being the nearest point to rich silver mines 20 miles distant, also junction for the new Atlantic & Pacific railroad now building. There were two horse cars in the place, but where they went we could not imagine, as the whole settlement does not cover half a unite square. After leaving this queer sort in a place we canse to the Riotrande river. We passed acres of handsome blue flowers, and low flat-stock cactus plants called 'priekly pear,' and some with large yellow flowers and some with pink flowers. Al one o'clock we stopped set a place called Sabinal, a Spanish settlement of about a dozen houses made of arlobe, the entrance to some of them being on the roof. We stopped here half an hour and examined the place. Near the track was an old Catholic (Spanish) church and grave-yard. The church was built of mind and straw, and looked quaint indeed to one accustomed to seeing beautiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in modern designs of architecture, with tall steeples towccing heartiful churches built in the being whitewashed or plastered with tall steeples towccing heartiful with could alique with the stock with gold and heart down and steep of the proposition of the parlor which was nicely furnished with Brussels capet, stulted chairs, lace curtans, positiats on the wall set in massive gith frames, a It seems no if we in this country wer drifling gradually towards the state of affairs in regard to property which has prevniled in Europe for centuries, that we are becoming a people of extremely rich and extremely poor. Very gradually this change is taking place, nail the cases of the two extremes are not large now, especially of the latter; for notwithstanding the grumbling of some who are too lazy to work and the fanatical talk of communists who oblain a good living for themselves by emlenvoring to make others discontented, lahur is generally prelty fairly remnucrated

Still there is a tendeacy lo the accumulation of immense fortunes in the hands of a few individuals and families, a healthy state of society. We know we must have rich people and poor penple; we know that if all the property In this country were to be divided to nour row morning exactly equally among our entire population, before to-morrow night some would be comparatively rich and others in the same ratio poor; but, particularly in our cities, we are, year limbate after year, seeing that the money of the country is getting into the hamls of the few; and of hate years it not only slays in certain families, but it in accumulates. And as one who has varefully studied the politics of our country since the war can have failed to note the influence that the concentration of humense fortunes among a few can have upon the welfare of the country. Inston, and our city is a good representative of the old Hay State, has felt that hunoful influence less than other clies have felt it; would is here more venify distributed; we have a great roamy moderately rich men and not a large number of millionaries; but even here we observe the same tendency—the accumulation gradually of a value recursion of the country will not gradually and the hamls of a few families.

SPRING

The Methodists of East Braintree held an anniversary Sunday School concert on Monday avening, it being just one year on that day, August 8, from the time they met for the first time in form a nucleus for a Sunday School. The meeting was made quite interesting by a concert exercise by the sebool, conducted by the superintendent Mr. Honry Storme. At the npening a few remerks were made by the superinted when the exercise was commenced with the singing of an anniversary hymn, followed by a scripture reading by Mr. Storme and prayor by Rev. Mr. Brightmen. Song, "Whera bast thou gleaned to-day?" Recitation by Alice Curtis. To the question, "What have we done?" propounded by the superintendent, Miss Hohart's class replied by repeating passages of Scripture on Working and also on Fraying. Mr. Jenkins' class then took up Hopling in the same manner, at the close of which remerks were made npon the subject by Mr. Jenkins. Miss Sauther's class then took up the subject of Watching and a rectision was given enforcing that duty, after which Mr. Jenkins apoke ipon that subject, and Walling was the next theme, showing this duty by passages from the Hibbs. As a last theme Triasing was cuforced in rhyme by five young ladies. Remarks were made by the pastor at the close upon Thankfulness, which were very agreeable and interesting, altbough the lesson of thankfulness was not enforced with that terseness which many of the ancedotes related would warrant, and closing the exercises with singing and the doxology. The singing by the Allen Quartette was excellent, whilst that hy the children was above the average heard in Sunday Schools. The secretary's report made the first of the evening was as follows:

ietie was excellent, whilst that by lie children was above the average heard in Sunday Schools. The sceretary's report made the first in the evening was as follows: "This school was organized August 8th, 1880. The following officers were elected: Superintendent, Henry Stormo; Assistant Superintendent, O. B. Sears; Treasurer, C. L. Sherman; Secretary and Librarian, Wm. Miller. Three classes were formel, No. 1 Miss Faxnn, Teacher; No. 2 O. B. Sears; No. 3 Charlotte Hohart. The attendance on the first Stunlay was 22. The school now consists of four classes having teachers as follows: No. 1, Mrs. A. S. Jordan; No. 2, Misa Emma Sonther; No. 3, Miss Charlotte Hohart; No. 4, Mr. S. F. Jenklus. Total attendance during the year, 1043, an average of a little more than 13; There has been one death in the school, a little girl by the name of Ida Hanson."

The treasurer reported that there had been received from penny collections, 224.42; pull out for booke, papers, etc., 222.85, leaving a Islance in the treasury of 81.57. Thus passed an evening of enjoyment for the children and pleasure for adults.

The Beauly and Color of the helt may be afely regulated by using Parker's Hair Italian which is much admired for its perfume, cleanlines and dandulf cradicating properties.

Will the nowers of Enrope gression in North Africa? Is a question n which deep interest is felt the world over. Italy would gladly drive France out of Tunis, if she had the power to do it without assistance in an attack. Russia offers none, and Bismarck is content to consider a course which will end in dis-aster. Spain has bristled up and shown some disposition to resent French aggression in North Africa, and England has

has no latention to seize Tripoll, but that the Porte is eathlishing agents in Tripoll to excite insurrection across the border, hoping by a revoit of the Araba to regain Turkey's regency of Tunis. Therefore, England notifies Turkey that no occasion for complaint must be given by France by the operation of agents of the Porto in Tripoll. So the matter standa as the iniciligence comes of great excitement in Tunis at the revolt of the Araba as movement which endangers the lives of sil Europeans on Tunisian soil.

The situation is full of peril, not only for the French power in Tunis, but also for the pence of Europe. If the Turks acide insurrection throughout Tunis, and the head of the plate with places of fried bread.

pices of the Spiritualist association last Samlay, at Hayward's Grove, was well atthe dublius aspect of the weather in the morning, and the audience were well publ by listening to an able and eloquent lecture by Mrc. C. Fannie Ailyn, upon "The powers of the human mind," and, a poem upon "Where are our dead," both subjects being given by persons to the sudience. The weather being such that no meeting was held in the morning, it was thought best to hold one in the half in the evening. There was a full attendance, and the lecture mont the "Testsment Revised" was probable effects the revision would have pon the people sui their estimate of the book itself. After the close of the lecture

sing gave psychometric resultings from hand-keroblefs which had keen wrapped in pa-pers and laid upon the table previous to ier entering the half, which readings were minently satisfactory, llinstrating as they did the lecture of the afternoon, and showing the power of the human mind in this

Common, (so called), has been pisced by the selectmen in the hamis of Juseph A. Arnold. \$300 was appropriated by the town at its annual meeting for this purpage. No doubt that the work alone will be in keeping with the ornament which was placed over the entrance to the comnon a year or two ago.

Arrived at Shippard's wharf, yesterday, schooner L. A. Habecek, loaded with coai; also, schooner A. P. Nowell, loaded with coal consigned to J. F. Sheppard,

The vacancy on the school committee occasioned by the resignation of Alverdo Mason, was filled at a joint convention of the selectmen and school committee held iast Monday afternoon, by the choice of Henry A. Johnson, Esq. An excellent se

trest- a Michael Donoyan was arrested on Friday Quincy, and Pease of Weymouth, for an assault upon John Maloney at East Brainree. He was arraigned in the District Court on Saturday morning, when the case was postponed for one week, Donovan being placed under \$1500 ball for appearance at that time, falling to obtain which, he was taken to Deiliam jall.

We understand that an arrangement has been entered into by the Nute Bros. with d. D. Whicher & Co., lant manufacturers, of Quincy, by which they are to make all the shoes that the lirm may wish. For this jurpose, it is stated, the Nate Bros. have filred the whole of the large shop standing trear the depot at South Braintree, and will soon have it in running order. This will be a good thing for the workmen in that part of the lawn, as they will not probably have to travel away from home for work, and certainly the town is the gainer whenever there is a lusiness comes into its precincts, or is increased within its border so as to afford more employment for its citizens. We feel that the citizens of Braintree are derelict to their own ining no stronger inducements for men in

business to locate within our boniers. Certainly, there is no town in this vicibity but ter situated us regards railroad facilities and accommodations accessary to the fur-therance of business interests, but either equse the owners of the land will no sell their famil for such purposes, or else hold that which is available for it at so righ a price, business men will not luvest Highway Improvement.

The moving back of the fence in front of the residences of Paul J. Minchin and

William A. Bishop, on Washington street, and the gravelling of the sidewalk, has made a decided improvement in that part of the town, and it is hoped that some others may be induced to "go and do like-wise." The work has been done under the frection of the selectmen, by Henry A

We notice that a few of the residents of East Braintree have caused all grass arneds growing on the sidewalk by the shlo if the fence adjoining their land to be renoved, thus making the shiewalks much cater and better to havel upon. If other could be induced to do the same, it would not only benefit the travelling public, but could pay the owners of adjoining land in the saving of work another year, as wei s in the neader appearance of their fence

There is a shrub ealled manloe, or manihot, or easawa, which grows in South America, the West Indies, and Africa. It has a great bulbous root, and it is in this root which is interesting. In that species of the plant which is most used the root has a bitter, aerid ulce, which is deadly poisonous. The strange part of the matter is that both the root and the polsonous julceare used for food, and probably every boy and girl who reads this has eaten both. The antives of hot countries dry the root, and make good wholesome bread, out of it. It is only the julce which is palsonous Miss II.
